

Memorandum of Understanding (MoU)

BETWEEN

Blue Eyes Intelligence Engineering and Sciences Publication (BEIESP)

AND

Lattice Science Publication (LSP)

In a joint effort to enhance publishing capabilities, the parties have signed a formal Memorandum of Understanding (MOU) to establish industry best practices and facilitate resource sharing between the above two publishers.

In this partnership, we will exchange reviewers to strengthen the peer-review process, collaborate on publication policies and technical tools, and improve peer-review systems. Both publishers will share expertise from their programming teams and resources to enhance operational efficiency and publishing quality.

The Memorandum of Understanding (MoU) between "Lattice Science Publication (LSP)" and "Blue Eyes Intelligence Engineering and Sciences Publication (BEIESP)" facilitates resource sharing. However, that does not mean that both are the same. Each publisher retains its own identity and manages its journals independently, ensuring that both publishers uphold their respective publishing standards.
